

# Deployment

Learn here about deployment options of a CAP application.

## Deploy to Cloud Foundry

A comprehensive guide on deploying applications built with SAP Cloud Application Programming Model (CAP) to SAP BTP Cloud Foundry environment.

## Deploy to Kyma/K8s

A step-by-step guide on how to deploy a CAP (Cloud Application Programming Model) application to Kyma Runtime of SAP Business Technology Platform.

## Microservices with CAP

A guide on deploying SAP Cloud Application Programming Model (CAP) applications as microservices to the SAP BTP Cloud Foundry environment.

## Deploy with CI/CD

A comprehensive guide to implementing continuous integration and continuous deployment (CI/CD) for CAP projects using best practices, tools, and services.

## Custom Builds

The guide provides an overview of custom build processes for CAP projects, explaining how to tailor the standard build process to specific project requirements.

## Health Checks

The guide provides an overview of health checks that are available on Cloud Foundry and Kubernetes, how to configure them, as well as the respective defaults of the two CAP stacks.
